

In The Specification:

Please replace the paragraph found on page 3, from line 3 through line 10, with the following substitute paragraph:

In accordance with the present invention, a system and method are disclosed for efficiently implementing an electronic device architecture. In one embodiment, an electronic system may preferably include, but is not limited to, a central processing unit (CPU), a primary device, a memory, one or more primary peripheral devices, an auxiliary device, and one or more auxiliary peripheral devices. In accordance with the present invention, the primary device may preferably communicate with the auxiliary device via either a primary channel or an auxiliary channel.
